PAR ANGÉLIK IFFENNECKER

REVEAL

With my Eyebrow Kit, I choose...THIS BRUSH

"To see all clear
Brush them the wrong way
To reveal its right way
And let the line appear"

This professional tool fitted with an ergonomic handle was specifically developed for the eyebrow. Its sloping top enables the perfect gesture. It grooms brows while following the eyebrow arch.

DIRECTIONS FOR USE:

Revealing the eyebrow line is the very first step before the make-up stage. I first brush hair from bottom to the top and from roots to the edge in order to let the line appear. Then I brush hair in its natural direction until tidy.

CARE:

When cleaning, use water and gentle soap, rinse carefully with water. Leave the brush to dry naturally.

ANGELIK'S ADVICE:

This Brush can be used for lashes.
After drawing the eyebrow, the brush brings the final touch by fading a drawing stroke which would be too marked.
The colour then melts naturally into the eyebrow shape.

DRAW

With my Eyebrow Kit, I choose...THIS PENCIL

"On my face as delicate as paper
I draw a curve and its brow
Becomes an imperceptible sculpture"

The high precision lead pencil ranges in eleven shades which fit naturally to your colours (eyebrow and hair colours, skin complexion) and nature for an enhanced effect.

Thin, long lasting, water resistant, it does not need any pencil sharpener. It is really easy to use to get a perfect hair drawing and a fading effect. The look, thanks to this eyebrow shaping action, is revealed.

DIRECTIONS FOR USE:

Draw the eyebrow hair by hair, create the ideal curve by optimizing the existing one and by intensifying the look of the line. At this stage, I create movement, I structure the top of the arch, I expand the tail of the eyebrow. I use the Pencil to fill in a scar or pad a sparse area, simply by drawing a piece of hair where it is needed.
The dry texture of the Pencil brings a perfect long lasting effect, with no touch up needed during the day.

CARE:

Move the pencil lead out from one millimetre only to avoid breaking. Avoid pencil from falling.

ANGELIK'S ADVICE:

Drawing strokes can be faded with the Brush.
A beauty spot can be also be created or enhanced with the Pencil.

CONSECRATE

With my Eyebrow Kit, I choose...THIS FIXING GEL

"Here comes the time
Of an infinite caress"

This fixing gel comes as a mascara. Its high precision conical mini brush is perfectly designed for this application area. Transparent, undetectable, it brings a maximal and comfortable stability without leaving any traces. The eyebrow is consecrated, as sealed in time and space.

DIRECTIONS FOR USE:

Sealing the prior gestures by applying gel will give the perfect final touch to get a stable result. I apply gel by brushing the eyebrow from the roots to the top to place each piece of hair the way I want the line to be upheld. Eyebrow is then put in order and the whole line is secured. I let the gel dry. A daily use of the gel can in the long term help controlling wild pieces of hair or a weak eyebrow line: no more trick due to cowlick...

CARE:

Do not apply on lashes.

ANGELIK'S ADVICE:

If your eyebrow does not need any modification with The Pencil or if some day you do not wish to make up your eyebrow, you can use the gel by itself, only to stabilize the eyebrow line.
